DETAILED ACTION

Response to Arguments

1. Applicants have amended the claims to obviate the prior art used in the rejection in the previous office action. The rejections over Wan et al are hereby withdrawn.

Double Patenting

2. Claims 1-13 and 18-23 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-3 of copending Application No. 10/294,431. Although the conflicting claims are not identical, they are not patentably distinct from each other because they substantially overlap. For example, the first compound recited in claim 3 of the '431 application is fully embraced by claims 1-12 of the instant application.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Interference

3. Claims 1-13 and 18-23 are free of art. Applicant is hereby advised of a potential interference over US patent 7,019,159. Applicant will receive further correspondence once the appropriate action is taken to overcome the obvious-type double patenting rejection.
